

CASE STUDY

SKYPOD IS STAR PERFORMER

CLIENT: PINEFIELD GLASS

PROJECT: A NEW INNOVATIVE SKYLIGHT SOLUTION

Homeowners and developers in Scotland seeking the wow factor will welcome the news that Pinefield Glass has extended its innovative Skypod skylights range.

Elgin-based Pinefield Glass has now added a two-bar pitched gable end design to its Skypod offer.

The new design option from Eurocell eliminates the need for a central spider glazing bar, further improving aesthetics and increasing natural light inside the home.*

Skypod is an innovative new skylight solution from Pinefield Glass that offers homeowners and developers a cost effective means of incorporating modern architectural design and unbeatable thermal efficiency in any uninspiring flat-roofed rooms.

“We took the decision to offer our customers the two-bar Skypod option because it maximises natural light inside a property and accentuates the architectural proportions”

Bryan Yule

Managing Director, Pinefield Glass

The new two-bar gable design joins the existing three-bar version and Pinefield Glass has already had a number of enquiries about this latest addition to the range.

Skypod has quickly become a firm favourite with Pinefield Glass customers because both the three-bar and new two-bar options are more aesthetically appealing than rival PVC-U systems, whilst offering better value for money than aluminium alternatives.

With its modern architectural design, Skypod provides one of the most effective methods of adding a real focal point to any new or existing flat-roofed room.

Its innovative design means it can be fitted in just a few days, which minimises disruption on site. Plus, being available in a wide range of sizes, Skypod can be used for a wide range of applications such as extensions, orangeries, garden rooms, new build kitchen-diners and garage conversions, amongst others.

“We have had a very positive response from homeowners and developers to the new addition.”

Bryan added, **“It’s looking like the next few months are going to be busy for us as more of our customers look to maximise natural light in their homes in preparation for the spring sunshine.”**

Pinefield Glass offers both versions of Skypod in the full range of colours including Anthracite Grey, Moondust Grey, Golden Oak, Rosewood and White – with a white interior finish to maximise the light and airy feel as standard. Other colours are available to special order.

Skypod is supplied with self-cleaning, temperature controlled glass in Blue, Neutral, Bronze and Clear as standard. It achieves a U-value of 1.0W/m²K**, which ensures that homeowners can enjoy maximum levels of natural light in comfort all year round. Skypod has a fixed 20 degree roof pitch.
